40 Random out of the Full Set Meme Card HODLers

- The random number generation method will be used to select wetpotatobrain's HODLers, Meme Card HODLers and Gradient airdrop recipients.
- Specifically, the selection process is organized as follows:
  - It applies equally to every token in a collection
  - Each piece has an equal chance of being selected.
  - In other words, there is no need to segregate tokens across various addresses to increase your chance of success if you own multiple tokens in a collection
  - The mechanics of the process are publicly auditable and as described in the randomization process
