Step 4: Partial Airdrops

- There will be no partial airdrops for this drop

- The random number generation method will be used to select Memes allowlist recipients in both phase 1 and phase 2.
- Specifically, the selection process is organized as follows:
 - It applies equally to every token in a collection
 - Each piece has an equal chance of being selected.
 - In other words, there is no need to segregate tokens across various addresses to increase your chance of success if you own multiple tokens in a collection
 - The mechanics of the process are publicly auditable and as described in the randomization process
