- 6529 Meme Card HODLers: 20 (out of 3,508 HODLers)

Top 20 Meme Card HODLers

- The random number generation method will be used to select the Gradient airdrop recipients.
- Specifically, the selection process is organized as follows:
 - It applies equally to every token in a collection
 - Each piece has an equal chance of being selected.
 - In other words, there is no need to segregate tokens across various addresses to increase your chance of success if you own multiple tokens in a collection
 - The mechanics of the process are publicly auditable and as described in the randomization process
