Step 4: Allowlist Phase 1 (104 allowlisted for up to 104 mints)

- Meme Card HODLers #1: 104
All full set Meme Card HODLers
- In this drop we will implement a 2-stage allowlist minting process
- Full set meme card HODLers will first have a 1-hour window to mint and are guaranteed a piece if it is minted in this 1-hour window
- Any pieces not minted during this step will be added to the remaining pieces for Allowlist Phase 2
- The random number generation method will be used to select the XCOPY HODLers, Gradient HODLers, and some of the Meme Card HODLers in Allowlist Phase 2. The selection process is organized as follows:
 - It applies equally to every token in a collection
 - Each piece has an equal chance of being selected.
 - In other words, there is no need to segregate tokens across various addresses to increase your chance of success if you own multiple tokens in a collection
 - The mechanics of the process are publicly auditable and as described in the randomization process
