## Step 4: Partial Airdrops (20 out of 399)
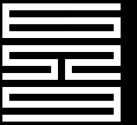

- Priyanka Patel Editions HODLers:          5 (out of 44 tokens)

- 6529 Gradient HODLers:                    10 (out of 101 tokens)

- The random number generation method will be used to select the airdrop recipients

- Specifically, the selection process is organized as follows:

  - It applies equally to every token in a collection

  - Each piece has an equal chance of being selected.

  - In other words, there is no need to segregate tokens across various addresses to increase your chance of success if you own multiple tokens in a collection

  - The mechanics of the process are publicly auditable and as described in the randomization process
