Step 4: Partial Airdrops

- There will be no partial airdrops for this drop

- The random number generation method will be used to select Memes allowlist recipients in phase 1.

- Specifically, the selection process is organized as follows:

  - It applies equally to every token in a collection

  - Each piece has an equal chance of being selected.

  - In other words, there is no need to segregate tokens across various addresses to increase your chance of success if you own multiple tokens in a collection

  - The mechanics of the process are publicly auditable and as described in the randomization process

- If you are using a cold wallet you can mint from a different ETH address by using **https://seize.io/delegation/delegation-center** to register and manage your delegated and sub-delegated wallets.
