▪ Muhju 1/1s: 30

▪ 6529 Memes: 10
  10 randomly picked Memes SZN2 full set collectors

▪ Gradient: 5
  5 randomly picked Gradient collectors

▪ The random number generation method will be used to select Muhju, Memes and Gradient airdrop recipients.

▪ Specifically, the selection process is organized as follows:

  ▪ It applies equally to every token in a collection

  ▪ Each piece has an equal chance of being selected.

  ▪ In other words, there is no need to segregate tokens across various addresses to increase your chance of success if you own multiple tokens in a collection

  ▪ The mechanics of the process are publicly auditable and as described in the randomization process
