Meme Card 5 Distribution

- Rekt Guy: 72 (out of 8,813 tokens)

- 6529 Gradient HODLers: 10 (out of 101 tokens)

- 6529 Meme Card HODLers: 42 (out of 3,300 tokens)

- The random number generation method will be used to select the airdrop recipients

- Specifically, the selection process is organized as follows:
  - It applies equally to every token in a collection
  - Each piece has an equal chance of being selected.
  - In other words, there is no need to segregate tokens across various addresses to increase your chance of success if you own multiple tokens in a collection
  - The mechanics of the process are publicly auditable and as described in the randomization process
