▪ Leafswan 1/1s: 12
12 random Leafswan 1/1s collectors

▪ The random number generation method will be used to select Leafswan airdrop recipients.

▪ Specifically, the selection process is organized as follows:

  ▪ It applies equally to every token in a collection

  ▪ Each piece has an equal chance of being selected.

  ▪ In other words, there is no need to segregate tokens across various addresses to increase your chance of success if you own multiple tokens in a collection

  ▪ The mechanics of the process are publicly auditable and as described in the randomization process
