- 6529 Meme Card HODLers: 200
  200 random SZN2 HODLers out of the ones
  holding only 1 card

- The random number generation method will be used to select Meme Card SZN2 HODLers airdrop recipients.

- Specifically, the selection process is organized as follows:
  - It applies equally to every token in a collection
  - Each piece has an equal chance of being selected.
  - In other words, there is no need to segregate tokens across various addresses to increase your chance of success if you own multiple tokens in a collection
  - The mechanics of the process are publicly auditable and as described in the randomization process
