## Step 4: Partial Airdrops

▪ There will be no partial airdrops for this drop

▪ The random number generation method will be used to select Memes allowlist recipients in both phase 1 and phase 2.

▪ Specifically, the selection process is organized as follows:

  ▪ It applies equally to every token in a collection

  ▪ Each piece has an equal chance of being selected.

  ▪ In other words, there is no need to segregate tokens across various addresses to increase your chance of success if you own multiple tokens in a collection

  ▪ The mechanics of the process are publicly auditable and as described in the randomization process
